

# Framework Web

## Designing Assessment

### Test 1

- Find the date interval between two dates with jQuery and Bootstrap.
- After execution of the code following result must be displayed.

**Date Interval**

---

From:

01/25/1990

To:

05/26/2016

Calculate

Date interval between  
01/25/1990 and 05/26/2016

In years :26  
In months :316  
In weeks :1374  
In days :9618

- Make sure each business logic is denoted with appropriate comments and make your code interactive and represent clean and clear output on your console screen.
- Implement this code using following concepts
  - 1.) [bootstrap-datetimepicker.min.css](#)
  - 2.) [bootstrap-datetimepicker.min.js](#)
